

cryptocurrencies

who needs over 2700 digital currencies?!

let's define
cryptocurrencies

“...a digital **currency** or decentralized system of exchange that uses advanced cryptography for security.”

decentralized

peer to peer

irreversible

banknotes vs. digital fiat vs. cryptocurrencies

today

	banknotes	digital money	cryptocurrencies
medium of exchange	1	2	3
unit of accounts	3	3	1
store of value	3	3	1
limited supply	1	1	3
acceptance	3	3	1
usability	3	3	1
let's sum it up	14	14	10

**what about
tomorrow?**

so...what about the 2700 cryptocurrencies?

five token dimensions

what about  crypto?

problem

too much information - too many tools - too many possibilities

exchanges / wallets

news / information

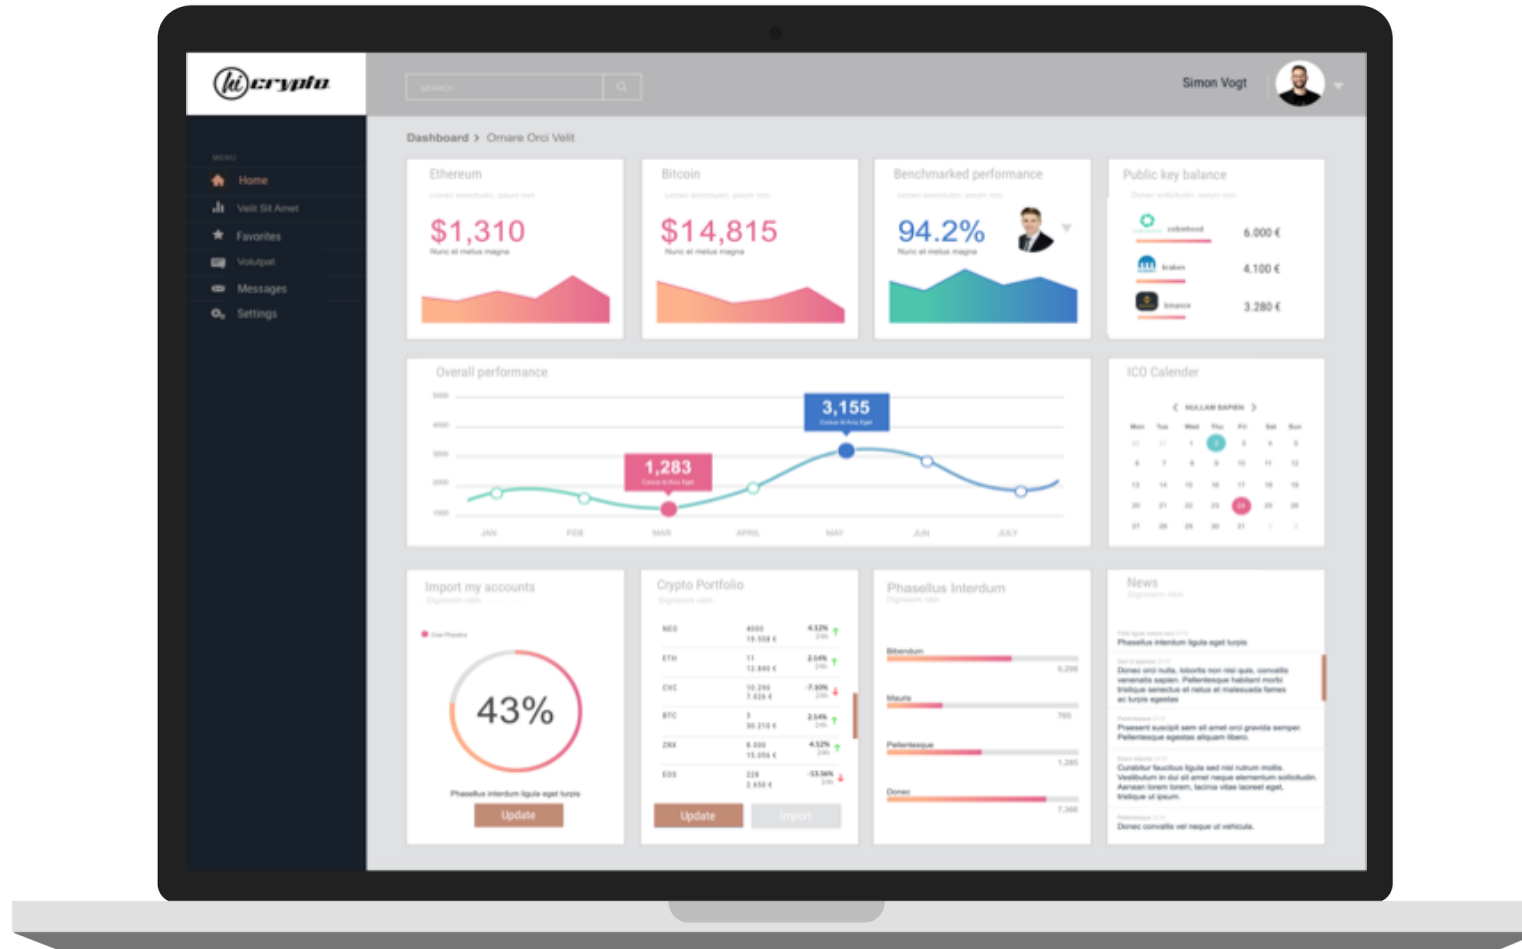

social media / communities

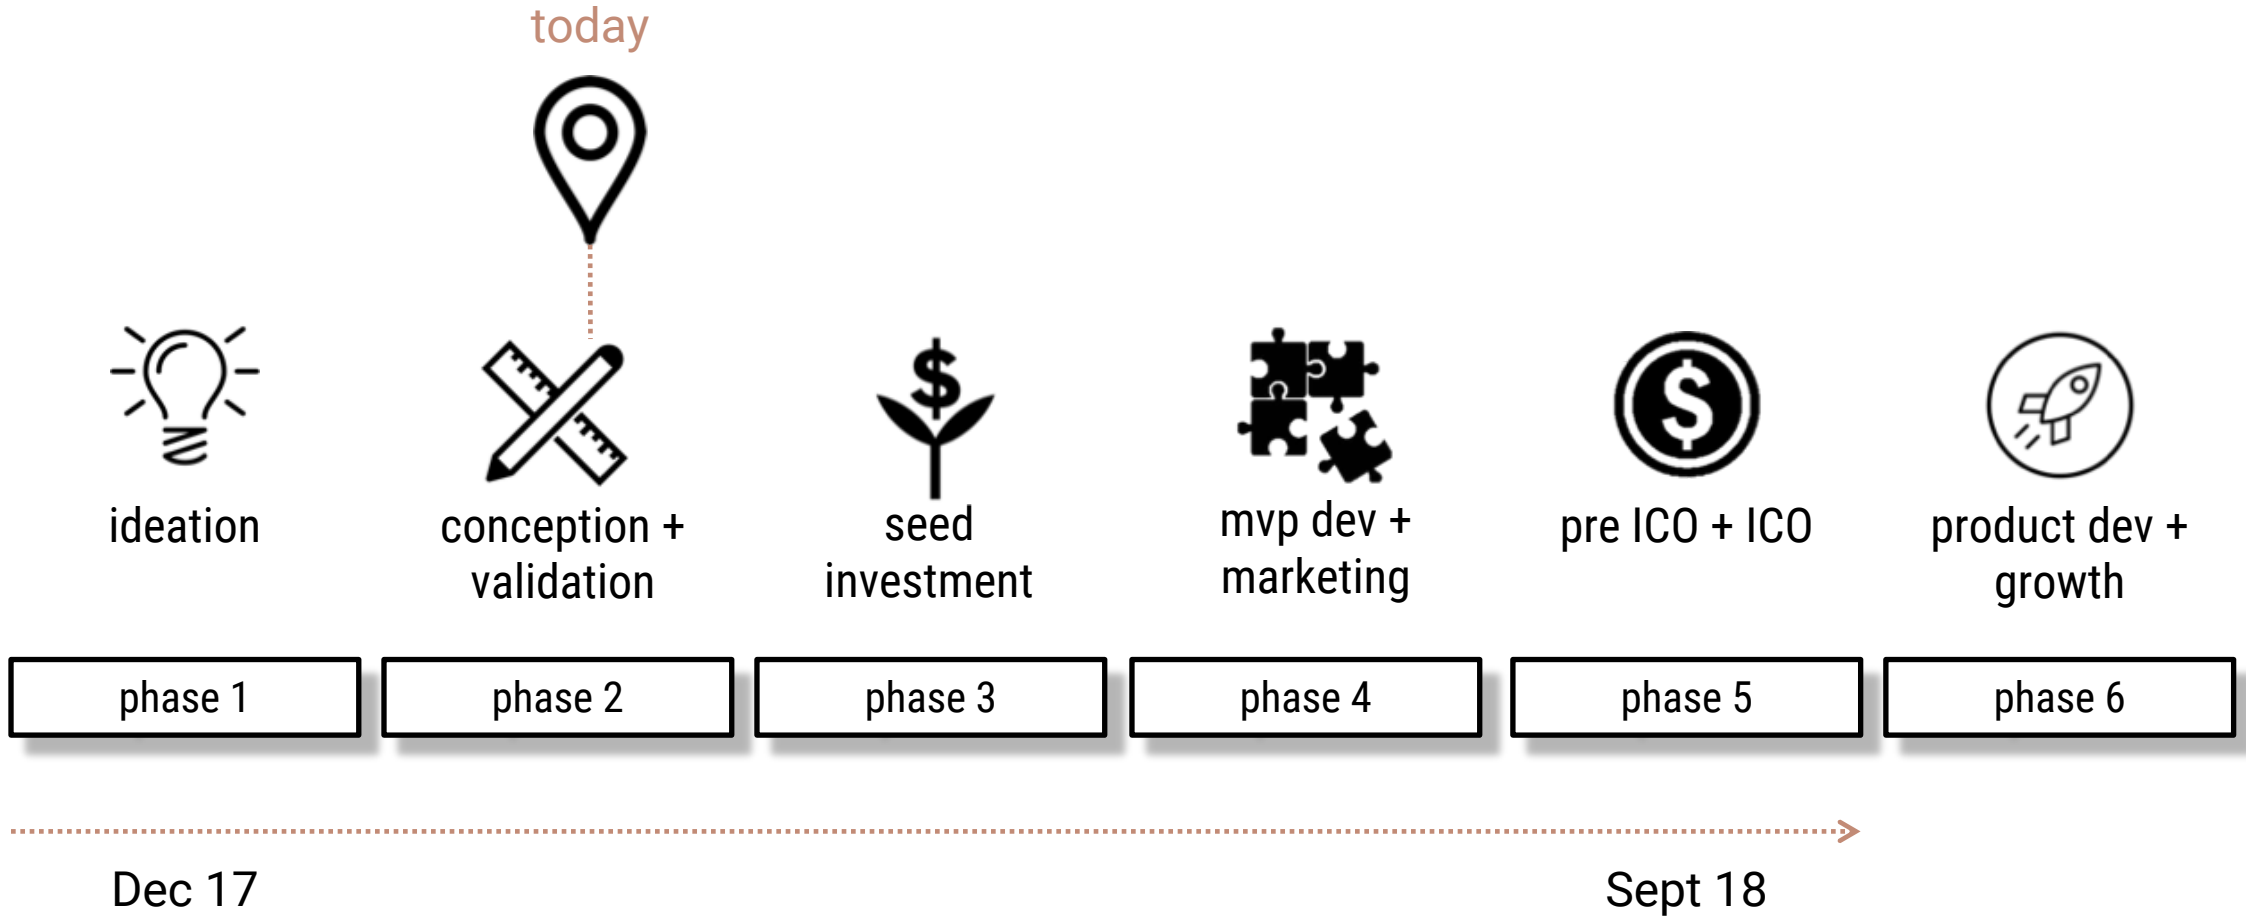

solution

customizable all-in-one tool - integrated user profiles for communication and benchmarking

next steps

preparing our own ICO

greatest needs

300K

equity based
on contribution
size

ICO and token
incentivation
